The unexpected is more the rule than the exception. What matters is how you approach it.

## Short description

Tobias Schmid has been working as a project manager at Affinitas AG since 2022 and brings with him a sound combination of technical knowledge and business expertise. As part of his industrial engineering & management science studies, which he successfully completed in mid-2023, he acquired extensive knowledge in the areas of business engineering, project and process management, business and data analysis, and supply chain management. Since then, he has been responsible on a full-time basis for the planning, coordination, and implementation of challenging projects.

Prior to this, Tobias Schmid gained many years of experience as a polytechnician in various industrial sectors, including medical technology, mechanical engineering, vehicle construction, and the sports equipment industry. This diverse expertise enables him to look at complex challenges from different perspectives and develop innovative solutions. A particular focus of his work is the holistic understanding of processes and interrelationships.

Tobias Schmid is always interested in the overall context of his work and has therefore acquired broad and interdisciplinary general knowledge. His affinity for digital technologies and his ability to translate these specifically into practical solutions characterize him as a project manager. Thanks to his structured and solution-oriented approach, he sees himself as a competent partner and mediator at the interface between business, technology, and IT.

As a project manager, he offers sound expertise for managers and decision-makers who are looking for a reliable and experienced consultant on a mandate basis.

## Focal points

- Customer mandates as project manager
- Collaboration in customer projects as reinforcement for Affinitas colleagues in interim and project mandates
- Preparation and follow-up of workshops
- Reinforcement in project planning, documentation work, training courses
